**Doorbell Security Camera-Specifications**

Installation Location/Camera Mount

The doorbell camera is to be installed in the existing doorbell fixture location at the front entrance of the unit. The camera housing unit is to fit within the constraints of the original doorbell fixture. If, for any reason, the unit resident removes the doorbell camera the unit's doorbell must be returned to its original condition.

**Garage Exterior Mount Security Camera-Specifications**

Installation Location/Camera Mount

The camera installation must be above the remote garage door opener which is located to the left of the garage door. **Cameras with a pan/tilt feature are not permitted.** Unit owners with two garage doors must install the camera above the remote garage door opener on the **left** garage door as seen from the street.

*Unit residents are limited to one garage exterior mounted security camera regardless of the number of unit garage doors.*

## Camera Dimension

Camera body and mount: The camera body and mount must be a **white in color** as defined by the manufacturer. Any power cord/adaptor used must also be white. The camera lens/infrared area may be non-white, i.e., black; this is the only area of the camera that can be a color other than white.

Camera body shapes can be of many designs; cylinders, squares, rectangles, etc., **not to exceed a size of 4 inches by 4 inches**. The measurement depth for the camera should not exceed 5 1/2 inches.

## Camera Mount/Installation Location

The bottom of the installed camera is to be **no lower than 5 inches** from the top left corner of the garage door finished trim boards and **fit within a five inch by five-inch area**. **No camera shall extend outward from its mounting plate more than 4 inches**.
